

A skill costs the same amount of skill points as its tier and the further a person levels up the more points they get each level.

The DM will grant skill points in a similar fashion to level ups, with some more frequency.

Each player starts with 5 skill points to invest in available trees

Importantly, you can only go up to a tier that your mod for that stat is equal too

This is confusing, but essentially, if you have a con of 16 and therefore a con mod of 3 you can only access perks in that tree up to tier 3

If you have a 4 or 5 in that stat you can access all tiers of that particular tree.

+1 mod - tier 1

+2 mod - tier 2

+3 mod - tier 3

+4 or higher - all tiers

Skill tree bonuses

When you invest a certain amount of skill points into a tree, you gain benefits based on what threshold you reached.

Headhunter/cool/wis tree

Levels

5 - +1 to stealth rolls

10 - + Wis mod damage when exploiting a weakness (not doubled)

15- + 1 skill point

+5 cyber cap

20- +1 investigation

25- +1 stealth

30- + Wis mod damage when you hit a crit or headshot (not doubled)

35- +1 skill point

+5 cyber cap

40- auto activate optical camo for a turn while grappling an enemy or taking down an enemy with a throwing weapon

45- gain the ability to use a throwing weapon as a reaction once per long rest

50- while unseen by enemies gain 20 movement speed

55- all unseen bonuses stay for the first turn of combat

60- unlock a special headhunter quest.

Netrunner/ Int tree

Levels

5 - gain +1 ram recovery in combat

10 - gain RAM equal to half your int mod

15- +1 skill point

+5 cyber cap

20- gain 10ft extra to smart weapon lock on range

25- gain +1 ram recovery in combat

30- gain ram equal to your int mod

35- +1 skill point

+5 cyber cap

40- technical quick hacks become cheaper equal to your int mod

45- your control and covert hacks last a turn longer

50- overclock lasts an extra turn

55- overclock now works through walls and takes int mod less hop to use

60- unlock special netrunner quest

Reflex's/ dex / shinobi tree

Levels

5 - increase movement speed by 5ft

10 - gain one extra air dash

15- +1 skill point

+5 cyber cap

20- after dodging or dashing gain +1 to damage and to hit

25- +1 skill point

+5 cyber cap

30- after an enemy misses you with an attack gain +1hp

35- +1 skill point

+5 cyber cap

40- if you take the dash action gain resistance to physical damage for that turn (only works if it's an action not bonus action)

45- +2 skill point

50- upon dashing add an extra two shots to your weapons ammo

55- while sandevistan is active, any skills you use don't expend a charge.

60- unlock a special reflex quest

Body/ solo / str tree

Levels

5 - gain 50lbs of carry capacity

10 - gain hp equal to con + str mod

15- +1 skill point

+5 cyber cap

20- gorilla arms have +1

25- gain advantage on throwing enemies

30- gain hp equal to str mod x 4

35- +1 skill point

+5 cyber cap

40- if an enemy remains within 5ft of you for a turn cycle, you can melee attack with a bonus action against them

45- quick melee and punch attacks deal +1 damage

50- berserk lasts an additional turn

55- when adrenaline rush ends, always heal for half of your remaining temp hp

60- unlock a secret body quest

Tech / junkie / con tree

Levels

5 - gain +1 to con saves

10 - gain cyberware capacity equal to $\text{you5 con mod} \times 2$

15- +1 skill point

+5 cyber cap

20- grenades and projectile launch system radius increased by 10ft

25- gain +1 ac

30- gain cyberware capacity equal to $\text{con mod} \times 3$

35- +1 skill point

+5 cyber cap

40- lightning damage goes through enemy resistances and deals extra to weak enemies equal to con mod

45- health items heal for $\text{con mod} \times 2$ more hp

50- the projectile launch system gains an additional charge

55- gain 25 additional cyberware capacity

60- unlock a secret tech quest

Rocket boy / cha tree

Levels

5 - gain cyberware capacity equal to $\text{your cha} + \text{con}$

10 - inspire also heals allies effected for cha mod

15- +1 skill points

+5 cyber cap

20- receive a gift of special cyberware

25- connections can be used an additional time

30- +2 skill points

+5 cyber cap

35- inspire now heals allies for cha mod x2 instead

40- +3 skill points

60- unlock a special rockerboy quest

Scan (free skill for all)

Up to as many times as you would like you can scan enemies as a bonus action, the amount of enemies you can scan per usage is determined by optic tier + int mod

Scanning an enemy allows you to use quick hacks on them and target tech weapons onto them.

The act of scanning is an intelligence check and the higher you roll the more revealed information, such as weaknesses, affiliation, information, bounties and more.

The scan range is 15ft but you can add your optic zoom range to this number.

Netrunner/Intelligence (int) Skill tree

Each skill tree has three branches, sometimes with special skills requiring abilities from other branches, so they have to build in different ways to get them(often the strongest)

Applicable stats: intelligence, Dex, Con

Cloud controller tree

Information is the strongest weapon, this tree focuses on using information on its enemies to control them and break them. This is basically the same class as Lucy and kiwi if you want that.

Tier one

Insight Hack

Bonus action

Get a description on an enemy within a 100m range, scanning the internet to display their known identity to the user. (Bonus action)

Tier two

Analyze

Bonus action

Choose a target, understand that targets move set and gain advantage on netrunner checks while you fight them for as long as they use the same weapon/fighting style that was scanned.

Additionally, learn any damage vulnerabilities or resistances they may have

Deep dive

Action

If the user has a deep dive port attached, they can now deep dive into the net. Otherwise they additionally gain the ability to get slight amounts of information from a targets memory

Tier three

Requires deep dive

Controller

Passive

Gain the ability to control small constructs with your mind, while in deep dive the amount and size can increase.

Cracker

Passive

Become an elite cybernetic cracker, when attempting to hack people and machines in deep dive gain advantage. Additionally, you can now access the deep net where tips to the location of high level cyber wear can be found but is very dangerous.

Requires analyze

Bloodhound

Action to plant

Choose a target to bug, you know they're location at all times and can deliver a strong electric shock to them, dealing 4d8, whenever they're in a range of 50m. This ability can be transferred to another target as an action within vision if the original nullified it or died.

Usable once per long rest

Eye's in the sky

Passive

Gain access to cameras of night city that you can't see (the chance of there being a camera nearby is changed by the urban level of the are), and any enemy that was previously seen in the last turn can be seen through walls for two turncycles or until interrupted/lost concentration

Tier four

Requires controller and bloodhound

The Web

Passive

Gain control of many small construct or access to control over one large construct.

These small constructs can be small robots that can work together to deal damage and alter environments. However, these robots must be found or designed by the user.

Control a larger construct, such as a cyber psycho or larger robot through your mind. They'll be capable of fighting for you or taking hits for you.

With Both options, utilizing these benefits takes actions or bonus actions depending on the type of cyberware.

Requires eyes in the sky and cracker

The moon

Passive

Blessed by the moon, you gain the ability to protect your friends from harm.

Gain the ability to enter deep dive quickly and freely dive through peoples minds, once inside the runner gains access to all of their memories. Additionally, you can reverse the effects of any other net runner abilities if you pass a hacking check, which you now gain advantage on. Lastly, you can temporarily stop the effects of cyber psychosis by making contact.

The quick fixer tree

Tier one

Stun

Action

Attempt to disorient an opponent giving them disadvantage on attacks and checks until they succeed a con saving throw. (action but usable like a cantrip for no ram)

Usable half of int mod times per long rest

Tier two

On the fly

Passive sorta

Your hacking is quickened, any non ultimate hacking that would be an action becomes a bonus action and any that would be a bonus action can also be a reaction.

This skill is usable equal to half your intelligence modifier per long rest.

Under pressure

Passive

Hacking doesn't gain a disadvantage when they're within 5ft of you and you gain advantage on checks to maintain concentration during your hacking.

Tier three

Requires under pressure

Remoraid

Action

Gain the ability to eject other peoples hard drives from their necks if they fail a constitution saving throw, disadvantage if they don't see the runner. When performed it ejects 1-4 hard drives based on a d4 roll, which can then be snagged and implanted.

Speciality

Passive

The user gains an affinity for hacking a particular faction, they gain advantage on all quickhacks against this faction's members while also managing to understand the in and outs of their cyberware. This grants them unique access to their databases and also the ability to stunt their cyberware for 1d4 turns.

Stunting cyberware takes an action to do, and has a 5 turn cooldown.

Requires on the fly

Multihack

Bonus action

The user can combine two quick hacks into one action up to half their intelligence modifier times, both will be slightly reduced in effectiveness but with good flavouring can deal plenty more damage and utility.

This cannot be used with ultimate hacks unless otherwise granted.

Usable half of int mod per long rest

Hackathon

Passive

Neutralising an enemy with the final hit, grants

Ram back equal to your int mod and transfers the remaining hacks on that enemy to another within 25ft.

Requires hackathon and specialty

The mass

Bonus action to activate, hack is still an action

Gain the ability to group hack, when you hack an enemy, all enemies within 25ft range of that enemy are given the same hack for no extra Ram cost (works the same for machine hacks with a range of 50ft).

Hackathon gains 100ft range and stunt cyberware reduces cooldown to 4 turns.

Usable half of int mod per long rest

Requires multipack and remoraid

The break

Action

Plant a bug on an opponent by touching them, this counts as an action, they take a cha save that scales on intelligence on each one of their turns until they fail. When they fail, they will take every single non ultimate quick hack all at once, for no RAM cost and have 1-4 hard drives ejected.

Usable once per long rest

The unrelenting tree

Tier 1

Ram boost

Passive

Gain one extra quick hack slot to your cyberdeck, cannot use ultimate hacks or technical hacks

Or

Gain extra RAM equal to your int mod

Tier 2

Control

Action

Gain the ability to control an enemy for as long as they fail a con save, you can direct them to perform actions or attack as a bonus action.

Usable half of int mod times per long rest

Smart cookie

Passive

Smart weapons lock on one turn quicker, but also lock on duration is cut in half.

Tier 3

Requires smart cookie

Overclock

Bonus action

When all ram are exhausted, use hp equal to the cost x2 to cast them instead. Lasts 2 turns.

Can be used equal to half intelligence modifier times per long rest

Ramp up

Passive

Gain plus one to hit and to damage for each turn your smart weapon is locked onto an enemy.

Requires control

Unstopped

Bonus action to activate

Up to half your intelligence modifier times, use no ram when using any quick hacking that's not ultimate

Wire master

Passive and action to grapple

While using monowire as weapon, gain plus one to damage and to hit. Additionally, gain the ability to grapple an enemy with monowire halting their movement speed and dealing 1d4 plus intelligence modifier per turn.

Tier 4

Requires wire master and over lock

The Wire

Action

As an action, spread mono wire over a large 25ft area of your choosing in any arrangement. Anyone or thing who touches the wire is given a random tier 4 or lower quick hack and takes damage equal to the skill level of the netrunner halved. As a bonus action, the wire can be pushed up to 20ft in any direction to user would like.

This ability lasts for 3 turns and can be used only once per long rest.

While overclock is active, whenever you apply a quick hack to an enemy with The Wire, gain 1d6hp for each quick hack applied

Requires unstopped and ramp up

The turret

Passive

Smart weapons can now be autonomously fired from the user. This means that the user can choose one smart weapon they own to attach to themselves and fire itself once every other turn for no action. However, depending on the tier of the weapon the cooldown time may be longer or shorter.

This smart weapon consumes no Ram to use and locks on instantly to a random enemy target.

Head hunter/Cool(wisdom) skill trees

Long shot tree

This is a tree specifically for those who want to function from long ranges and remain outside the battle.

Tier one

Heightened eyes

You no longer receive disadvantage on shots over 150fy, range until disadvantage is increased to 200ft

And snipers now scale on wis not Str

Tier two

Deep breath

If you didn't attack the turn before in combat, the next shot you take has advantage. (Doesn't apply to first turn cycle)

Keen memory

The first turn after an enemy takes cover doesn't grant disadvantage to your next shot.

Tier three

Requires deep breaths

Dodge shot

As a bonus action, if you took a shot this turn perform a roll that gives disadvantage to the first attack of each enemy that turn cycle and take half damage from any attacks that hit. (Usable equal to wis modifier times per long rest).

Keen shot

The next shot you take has advantage and a higher chance to cripple the enemy depending on the roll.

(Usable equal to wis modifier divided by 2 times)

Leg target: knocks the enemy prone and disables movement

Head target: deals extra damage equal to charisma modifier x2

Arm target: cripple the arm preventing dual weilding and sheilds

Body target: pierce through the enemy and hit multiple targets.

Requires keen memory

Arsenal

When firing a special bullet, obtain a unique effect.

Ricochet: no disadvantage on ricochet shots, but the enemy can still react if expected.

Chip: load two quick hacks onto chip bullets

Explosive: deals more damage to surfaces, when breaking cover it's more effective.

Add more with sniper bullet types

Specialty

Against a certain gang the user has advantage on all shots outside of a 50ft range.

Additionally, twice per long rest, the user can fire a special shot against this gang that has a coin flip chance to break off cleanly any cyberware they have. (Meaning the cyberware can be shot off and stolen)

Tier 4

Requires dodge shot and specialty

The Thrill

All sniper rifle restrictions are lifted, as the user uses them for sport.

Snipers can be used with one hand, can be used while moving, can be used in duel wielding, can be used within 5ft of a target, while falling. (All with no disadvantage)

Additionally, when the user is spotted by an enemy they gain +3 on their shots to hit and damage for as long as they are seen.

Require keen shot and arsenal

The Moment

A colder more methodical sniper

While unknown by the enemy gain +3 on all shots to hit and damage.

Additionally, disguise yourself from any netrunner tracking through a lowered heart rate and calm mind.

Once discovered, you can secretly swap yourself out with a projection while still appear to be there twice per long rest. (This ability only works if the target is over 80ft away)

Pot shot tree

The cool gunslinger tree, they're hot shots who focus on getting headshots for fun and cleanly finishing jobs

Tier 1

Runner

You don't get disadvantage while shooting from moving vehicles or while running

Tier 2

Focus

Activate focus mode, add your Wis modifier to all to hit for proficient weapons, activate with bonus action and lasts until a shot or throw is missed.

(usable equal to wis modifier time per long rest)

Dark

While unseen, all knives and throwing weapons/projectiles deal extra damage equal to wis modifier.

Tier 3

Requires focus

Unshaken aim

While focus is active, thrown projectiles like grenades, knives and anything else can be shot out of the air or hit with a thrown weapon and back at the enemy as a reaction. The roll to succeed is a dex check that you can add your Wis modifier too as well.

Deadeye

While in focus mode, Increased damage based on whether or not you hit the head of an enemy.

Any roll of natural 15 or above adds the Wis modifier to damage

Any natural 20/critical hit adds 2x the Wis modifier and has a guaranteed cripple(meaning the target will be impaired in some way) chance

Requires dark

Scorpion sting

Your thrown weapons apply poison effects to enemies hit by them for 3 turns if the hit was a headshot (15 or above)

Adrenaline

After taking two or more different attacks in a single turn, the next turn gain over health equal to your Wis modifier x2 and take half damage on the next attack. (Usable equal to half Wis modifier times per long rest)

Requires adrenaline and deadeye

The trickshooter

While you are in focus mode and have used adrenaline in the combat, gain the following:

Activate trick shot mode, whenever you perform an attack with disadvantage and hit it, deal 2x the damage. However, if the shot misses focus mode is over and this bonus is gone (**The attack must have disadvantage for this to work, meaning if you use advantage to remove disadvantage it doesn't count (however the thrill perk does remove the disadvantage)**)

While in trick shot mode, gain unlimited adrenaline, meaning it's active for every single turn (**effect lost once they miss a shot**)

Usable half of Wis mod per long rest

Requires scorpion sting and unshaken aim

The slinger

While in focus mode, activate a secondary mode where for an action you get 6 shots of any light sidearm or 6 thrown weapons to distribute.

The shots can hit multiple enemies, terrain or all be fired at one enemy.

When paired with something like a Sandevistan the user can hit bullets and rockets out of the air.

Usable half of Wis modifier times per long rest.

investigator tree

Calm and composed gunslingers, who use their awareness to guarantee more opportunities and chances to win

Tier 1

Perceptive

Gain advantage on investigation checks

Tier 2

Silence

Attacking an enemy immediately after they detect you hides you from other nearby enemies.

Grants advantage on the next stealth check after performing a takedown with this perk.

Detection

Perform a scan in a cone shape 25ms forward, this scan highlights cyberware, information and enemies through walls as well. However, it offers no data on the thing itself only marks it and explains its category.

Usable up to Wis modifier times per long rest

Tier 3

Requires silence

Undercover

Transform yourself or any others into any person you've seen before instantly, your ability to mimic their personality and voice aren't added.

Usable half of Wis modifier times per long rest

Deep depths

While prone, become totally invisible to all enemies not within 5ft of you and regain 1d6 health while prone per turn.

Additionally, getting up from prone can be done as a bonus action or reaction instead of a main action.

Requires Detection

Higher power

Your detection now reveals footsteps of enemies allowing you to track them potentially hours after they've been there.

This also provides the rarity of the cyberware, owner of any scanned vehicle, camera locations, enemy types, gang affiliation.

Attacking Scanned enemies also grants a +2 bonus to hit.

Roadster

Gain advantage on driving checks, as you harden your skills to drive. Additionally, gain the ability to drive as a bonus action, allowing you to shoot while driving and have no disadvantage while doing so.

While drifting or in the air gain plus + wis modifier to hit and damage.

Tier 4

Requires higher power and deep depths

The detective

A true professional

While in combat with an enemy that you have scanned gain a tracker on their location for charisma modifier number of turns in combat or 1 hour outside of combat. While this tracer is on them, analyses their cyberware to understand how it works and their specs.

Grants access to all info on their cyberware you would like and cannot be removed,

While fighting tracked enemies gain the predict reaction, allowing you to make a charisma check roll against any attack from a tracked enemy that turn
(Usable half of Wis modifier turns per long rest)

After successfully predicting an enemy the next attack you perform has advantage

Requires roadster and undercover

The chariot

Increased damage to other vehicles on hit and less damage to your vehicles on hit.

you can use a sandevistan to slow time while driving which makes your car move faster and giver you another chance to pass a save.

Hitting a shot while driving adds your wis mod to damage

Hitting a shot while drifting or in the air gives Wis mod x2 extra damage

Unlock a choice of special car options

Shinobi/Reflex(dex) tree

Plain sight tree

Use stealth and quick crackdowns on enemies, function more like a thief than a combat runner.

Tier one

Shadows

Gain proficiency in stealth (if they already have expertise in stealth, gain advantage on stealth checks)

Tier two

Well trained

When unseen by a target, gain the ability to stealth takedown, dealing damage equal to dex modifier x2, if that decreases half the enemies Hp it knocks them out.

My precious

While holding a stolen object double your walking speed and gain +3 Ac while not in combat.

Tier 3

Requires my precious

Title card

Bonus action

Gain the ability to use a charge of optical camo on an item to make it invisible to others.

Additionally, you can make an illusion on surface to have it display whatever image you'd like. Enemies must pass an insight check or fall for the illusion.

Usable dex mod times per long rest (using either will use a charge)

Low pulse

Passive

Detection cyberware such as heat detecting optics or heart monitors cannot find you as long as you can pass a dex save.

Additionally, you cannot be marked and you have to be scanned twice to reveal your info.

Requires well trained

Great Nullify

Reaction

When an enemy activates a perk against you, you can nullify it once and they expend the charge, as long as that perk isn't a tier 4 perk.

Shut down

Action

If you gain access to a enemy system through an access point or even wires, gain the ability to shutdown their power grid for 1 minute by passing a dex check.

This works on enemies to, if you can access wires on an enemy gain the ability to shut down that cyberware for a minute or until repaired.

Usable once per long rest

Tier 4

Requires title card and shutdown

The phantom

Passive

Your identity is shielded from cameras, scans and others. You cannot be marked or seen through skill abilities.

When ever you successfully perform a stealth takedown, automatically activate the effects of optical camo.

Your first attack after a successful stealth check deals an additional +3 damage.

Requires great nullify and low pulse

The depth

Bonus action

If you've touched a target in the past minute, gain the ability to shutdown a part of their cyberware for half of your Dex mod turns on a failed save.

Eyes: shut down their vision giving them the blinded condition

Arms: prevent the usage of weapons for duration

Legs: prevents movement for duration

Usable once per long rest, only expended if successful.

Bladee Tree

Focus on using blades a smaller sidearms to carve up in the close range, while still attempting to dodge as a glass cannon type

Tier 1

Blade mastery

Gain proficiency with blade weapons, additionally, whenever you draw blood from an enemy gain advantage on tracking them.

Tier 2

Mad dash

When moving directly at a chosen enemy, increase movement speed by 20ft and gain resistance to any opportunity attacks that particular enemy makes on you.

Bladerunner

After striking an enemy with a blade, gain the option to leap onto a nearby enemy for an extra attack dealing an extra 1d6 for each enemy leapt toward, usable dex modifier times per long rest

Costs one bonus action

When you leap from one enemy to another they may opportunity attack you, and mad dash doesn't grant resistance to any leaps.

Tier 3

Requires blade runner

Slice and dice

Gain the ability to parry various attacks as a reaction, you can use this equal to your dex modifier times:

Parrying sword attacks and melee attacks - uses one charge, make a sword roll against the enemies, if it's higher take no damage if it's lower take half damage

Parrying a gun - uses two charges, cuts a bullet that would hit you in half, doesn't work well against automatic weapons and only blocks half damage.

Parrying a grenade -uses 3 charges, cut a grenade in half and have it not explode.

Counterattack

Opportunity attacks made by you have +3 to hit and to damage. Additionally gain a reactionary attack that allows you to perform a sword attack against an enemy while they attack giving them disadvantage on their next hit.

Performable equal to half dex mod times per long rest

Requires mad dash

Slaughterhouse

Hitting an enemy with a sword attack applies a stack of bleed, after getting 3 stacks of bleed on an enemy, they're made to make a con save on to avoid losing any limbs or damaging any cyberware.

You can use three stacks of bleeding to make a devastating melee attack that deals and extra 2d8

Taste for battle

Attacking an enemy twice in a single turn restores 1d4hp

Attacking them 3 times in a single turn restores 1d8hp

Tier 4

Requires slaughterhouse and taste for battle

The psycho

Embrace your cyber psychosis for added strength, the psychos are doomed or the last left.

For each point threshold over your cyber capacity gain the follow benefits

10+ - taste for battle uses 2 dice instead of one

20+ - cutting off any limbs or disabling any cyberware with slaughterhouse restores hp equal to dex mod x 3

30+ - gain +2 to your Ac and additional max hp equal to your Dex mod x 4

50+ - unlock a new special usage move for your operating system as it integrates with your mind. **(This only works for one operating system and only while your over 50)**

Requires counterattack and parry

The samurai

Unlock the ability to quick draw, for dex modifier times per long rest, sheathe your sword as a bonus action and draw it again as an action.

While your sword is sheathed, melee attacks have advantage on hitting you, **gain resistance to one damage type of your choice while sheathed.**

When you draw your sword, the strike deals back half of all damage you took from the particular enemy that turn and hits every enemy within 5ms. Additionally, on draw, automatically parry the next projectiles.

This can be used at the start of combat if your sword is already sheathed and provides +3 to initiative if done.

Edgerunner tree

Use elite reflex's and mastery of weapons to traverse night city like a true edgerunner, get in, take out, get out.

Tier 1

Air dash

You can dash in the air for half your movement speed, allowing you to jump between buildings or over enemies to avoid opportunity attacks.

Usable equal to dex stat times per long rest

Tier 2

Parkour

Taking the dash action, airdash or disengage action reloads your weapon, all can be used as a bonus action but **(when used as a bonus action Slippery only applies to the first attack)**

You can make these a bonus action equal to half of your dex mod per long rest

Slippery

Whenever you take the dash or air dash action on your turn, gain +dex modifier ac while actively running (stopping ends this effect) **(when used as a bonus action Slippery only applies to the first attack)**

Tier 3

Requires slippery

Sharpshooter

Each made shot grants a stack of sharpshooter, this gives plus one on the next attack to hit and damage, however, once a shot is missed, all stacks of sharpshooter are removed. Additionally, when Sharpshooter reaches 7 stacks it resets back to 0.

Special delivery

Whenever you take the dash action drop one of the bombs below in your place:

Explosive - drops a small grenade that deals 1d8 to all nearby enemies

Smoke - creates a smokescreen hiding you from enemies and giving them disadvantage on chasing you

Shock - create a small shockwave that prevents enemies within from moving next turn

(all bombs have a 10ft range)

Requires parkour

Fun, Run and Gun

If you've moved in your turn already and are wielding an automatic weapon, fire as much as possible and deal 1d4 extra automatic damage per 10ft of movement while you run and gun the enemy. (usable equal to half dex modifier times per long rest)

Momentum

After performing an airdash in a turn, gain movement speed on the next turn equal to your dex modifier x5.

You can also air dash twice in one turn now with no movement speed penalty but the charge is used twice.

Tier 4

Requires sharpshooter and fun run and gun The survivor

You can exchange a stack of sharpshooter to gain +5hp of temp health per stack that lasts till the end of combat, so 7 stacks of sharpshooter becomes 35hp, while two stacks become 10hp

You can also exchange run and gun dice, roll all the d4s and add the resulting number as temp hp.

This effect is usable equal to half of dex mod per long rest

Requires momentum and special delivery The acrobat

While in the air, melee attacks deal an extra 1d8 damage.

Double your dex modifier and that's the amount of air dashes you can now perform per long rest

You can perform three air dashes in a single turn.

If you air dash onto an enemy, make a melee attack against them, if this is done they may opportunity attack you with disadvantage.

Solo / strength skill tree

Tank tree

Tier 1

Annoyance

Once per turn, yell out a taunt and roll a d20 to determine its effectiveness, causing all effected enemies to attack you at least once this turn cycle. (the effectiveness is increased by the player yelling better things)

Usable str mod times per long rest

Tier 2

Adrenaline rush

Gain temp hp equal to your strength modifier x 7, this temp hp depletes 10hp per turn.

Usable half of str modifier times per long rest

Using adrenaline rush while it's still active increases the depletion rate by 10hp each time and gives 5 temp cyber psychosis points.

One bonus action to use

Dorph-head

Blood pumps offer extra healing equal to your strength mod x 2

But add 5 temp cybercap points until the end of battle

Tier 3**Requires dorph-head****Regenerator**

For the next 3 turns, for every 5 missing hp gain 1hp per turn.

Usable half of str mod per long rest.

Blockage

If your hp is below 20% of its maximum blood pumps offer double healing and double temp cyber psychosis points.

Requires adrenaline rush**Unstoppable force**

While adrenaline rush is active, as in you have the temp hp, become unable to be grappled, stunned, paralyzed, prone and moved. (Unless the effect is undone via a quick hack)

Calm mind

Adrenaline rush decay rate is slowed down to 7hp per turn instead of ten and cyber psychosis point amounts are reduced by 2.

Tier 4**Requires unstoppable force and blockage****The end of the line**

When your hp hits 0, you have the choice to be knocked down or stay fighting. Instead of Hp, your hp becomes your cyber psychosis bar, damage is converted one to one and you only go down if forced or completely destroyed. Any cyber psychosis gained from this will slowly go (over days or weeks) away if not used again.

If your cyberpsychosis bar is already over the threshold when you reach 0hp, automatically activate this ability.

Essentially cyberpsychosis bar is your cap bar, if your over cap your considered in cyberpsychosis.

The blessed

When adrenaline rush or regenerator ends gain ac equal to your strength mod for the turn.

Every hit you block or are hit by reduces that ac by 1.

Each bullet from an automatic weapon counts toward the lower ac, meaning this is best against slow attacking enemies like melee or snipers.

Weapon master tree

Tier 1

Like a feather

Your movement is not penalized when using heavy firearms

Tier 2

DIE DIE DIE

Your last attack with any heavy or medium weapon fires twice if it has over 4 ammo

After reloading an empty weapon , gain resistance to the first physical damage you take that turn only if it has over 4 ammo

Obliteration

While wielding a heavy weapon, your shots gain the chance to suddenly instant kill or heavily damage enemies. As a special action, roll a d6, if it's a 6 activate this effect, which will cause instant death or dismemberment.

Usable half str mod times per long rest

Tier 3

Requires Die Die Die

Left hand

As a bonus action, throw a quick melee dealing normal melee damage and normal melee to hit. reloads your weapon by one shot.

Usable str mod times per long rest

Try Try Try

After defeating an enemy or dismembering an enemy with a shotgun or machine gun, gain +1 Ac for the next turn.

Requires obliterate

Pumped

Hitting an obliterate provides +3 on to hit and damage for your heavy weapons for the next 3 turns.

Bolted bullets

On attacks that use obliterate, ignore ac increases from armor on hit meaning hits despite cyber ware upgrades.

Tier 4

Requires left hand and try try try

The ripper

After landing a quick melee attack, if you shotgun shot this turn it has advantage to hit and deals additional damage equal to your str mod.

After landing a shot gun shot, if you quick melee attack this turn it has advantage to hit and deals additional damage equal to str mod.

Requires pumped and bolted bullets

The message

Obliterate becomes a d4 where you need a 4 instead

You get one reroll of the d4 and another usage

Breaker tree

Tier 1

Unphased

Gain advantage on any save to slow or stop your attacks on an enemy.

Tier 2

Wrecking ball

As an action, Charge forward in a straight line and make a melee attack that pushes enemies with you against all enemies you hit. This attack cannot be interrupted and charges perfectly straight by walking speed each time.

Any enemy hit must make a con save to not be prone

Usable strength mod times per long rest

Block

Put your weapon up to block as a bonus action, on each attack that hits you this turn roll a d4, a roll below 3 means nothing happens a roll of 3 and above means you have resistance against the damage

(Only applies if you can see the attacker)

Usable half strength mod times per long rest

Tier 3

Requires wrecking ball

Quake

Hit the ground with your fist and cause a rupture that hits enemy's in a 25ft cone shape. Any enemy inside the cone makes a con saving throw, to take half damage and to not be prone. The attack deals (strength mod)d8 damage and upon a failed con save prones the enemy.

Useable half of strength mod times per long rest

Ripple

For each enemy that wrecking ball hits, gain 1d6hp and +1 damage on your next attack.

Requires block

Reversal

After performing a successful block, the first attack you make will have advantage to hit and a 1d4 chance to stun the enemy. Roll a d4 and if it lands on a 4 the attack also stuns the enemy, if you roll a nat 20 the stun is guaranteed.

Fly swatter

While blocking ranged attacks gain guaranteed resistance and if you roll above a 2 on the d4 take no damage from the attack at all. **(Only applies if you can see the attacker)**

Tier 4

Requires fly swatter and ripple

The Goliath

Throw an enemy that is the same size as you or smaller, if they're larger with disadvantage, they take 4d10 and any people they land on take half that damage. Successfully performing the attack also heals you for half the damage you deal to the thrown enemy.

Requires reversal and quake

The hero

You can use quake while in the air to perform a super hero landing, this affects all people in a 20ft circle and has you take no fall damage (as long as the fall is less than 250ms, then you take half). This attack deals the normal damage as quake but if the fall is over 100ms all afflicted people are prone.

Additionally, gain a d8 temp hp for each person that's hit by this quake attack that is removed after 3 turns.

Techie tree / constitution tree

Scale up on the cyberware, your built different and need to show it.

Full borg tree

Tier 1

Built different

Gain cyberware capacity equal to 5 x your con.

Tier 2

Ambidextrous

Gain another hand implant slot

License to chrome

Unlock a new skeleton slot and gain +1 Ac

Tier 3

Requires ambidextrous

Ripper clientele

Whenever you get a new piece of cyberware, gain the ability to reroll the modifier on it a single time for free and find yourself more likely to receive gifts from rippers.

Cellular matrix

Gain access to the use of cellular software tech

(cellular software offers a resistance or immunity depending on your stat spread while also providing armor)

Requires license to chrome

Cyborg

If you have every cyberware slot filled gain the ability to lower the cooldown of a piece of cyberware by one turn, if your past your cyberware capacity, pick two different cyberware.

Chromedome

Choose one cyberware you have implanted, it provides half as many cyber capacity points as it says.

Tier 4

The Martinez

Gain the ability to convert one max hp into 2 cyberware capacity, use it as much as you would like

If youve converted 20 % of your max hp to cyberware, roll a d20 at the start of each turn, if it's a 20 activate fury mode and gain 20 temp cyberpsychosis points, temp hp equal to con x5 and damage/to hit bonus on all attacks equal to your con mod. (additionally criticals now hit with a 18 or 19 for the turn)

This effect lasts one turn

Survivor tree

Tier 1

Acclimated

The cooldown for when you can use health restoring items and grenades is reduced by one turn

Tier 2

Fast hands

Use a health item or grenade without using a bonus action for an extra two turns on the cooldown.

Useable con mod times per long rest

Recharge

After neutralising an enemy, if your grenades or health items are on cooldown reduce the cooldown by 1 turn.

Tier 3

Requires fast hands

Demolitions

You have resistance against all of the explosions you create through grenades or your own cyberware.

Additionally, other explosives that hit you deal less damage equal to your con mod x2

Speed boost

Using fast hands grants a bonus to health gained or damage dealt by your next grenade/health item equal to con x 2

Requires recharge

Pyromania

Hitting an enemy with an explosive grants +5 movement speed and +1 damage on the next explosions (stacks up to 5 times and is removed once it hits 6)

Mutual destruction

While at no charges, the charge rate for both the projectile launch system and grenades is reduced by one turn.

Tier 4

Requires pyromania and speed boost

The magician

Charge a high level EMP, takes one action to start the charge and will activate on your next turn. While charging the EMP you have resistance to oncoming physical damage, netrunners and hacks still hit you for normal damage.

Enemies hit by the EMP have to make a con save or be stunned, and the EMP hits in a radius of 30m in a large circle. If they pass the con save they will only have a cyberware ability disabled for 2 turns instead of the stun.

Usable once per long rest

Requires mutual destruction and demolitions

The doomlauncher

You gain an extra charge of the grenade or projectile launch system, and when it's charged, you can fire two charges at once.

Enemies also have disadvantage on the dex save to dodge for the first explosion they are hit with.

Armory tree

Tier 1

Mounted Gunner

Passive

Gain extra damage on vehicle mounted weapons equal to your con mod

Tier 2

Bolt

Bonus action

Fire a bolt shot against an enemy, deals 1d6 additional damage and converts all damage to lightning damage for the turn. The bolt shot can also be fired at metal surfaces to electrify them and can fry most electrical systems without enemies hearing the shot.

Usable con mod times per long rest

Heavy operator

Passive

While controlling turrets and other mounted gear gain advantage on your to hit.

Additionally, other peoples mounted turrets and robot extensions can be mounted and controlled by you if you can get close enough and pass a con check.

Tier 3

Requires bolt

Lightning strike

Passive

You have the option to roll a con save before using your bolt, if your con save is greater than the enemy AC your bolt will do extra damage equal to $\text{con mod} \times 2$ and will stun a cyberware bonus, if you fail the check the weapon misfires.

Semiconductor

Passive

You have the option to ignore enemy ac on your bolt shot, however if performed the bolt will deal half of it's normal damage but offer a guaranteed hit (does not work with lightning strike)

Requires heavy operator

Technical fighter

Passive

While using a tech weapon, hitting an enemy with the cover penetration feature offers temp hp equal to $\text{con mod} + 2$ until your next attack.

Powerful fighter

Passive

All power weapons scale on Con instead of strength (or equal to whatever one is higher) and recoil can be scaled between 0 and 15ft, meaning you can either send yourself flying with a shot or not move at all.

Hitting an enemy with the ricochet feature of power weapons offers $+\text{con mod}$ temp hp until your next attack

Tier 4

Requires technical fighter and lightning strike

The Tempest

Passive

Successfully shooting a lightning strike with a tech weapon causes the shot to fire as an arc in a 15ft line that damages up to 5 enemies in the area, until it fizzles out, and goes through walls. However, after going through a wall the arcs range decreases to 5ft.

Hitting up to 5 enemies with the arc gives advantage on the next con save to perform a lightning strike

Rocker boy trees/ Charisma/ cha mod tree

Rockstar tree

Tier 1

Musicians

Passive

Gain proficiency in performance and persuasion

You can gain advantage when rolling these checks for cha mod times per long rest

Tier 2

Inspire

Bonus action

Using whatever method of motivation you may utilize, by passing a performance check of 15 provide your allies with advantage and plus damage on their next roll equal to cha mod

Usable cha mod times per long rest

Berate

Bonus action

Using whatever method of demotivation you may utilize, by passing a persuasion check scaling based on the enemy. Give up to 3 enemies in a 10ft radius disadvantage on their next roll and lower ac equal to half of Cha mod for one turn.

Usable cha mod times per long rest

Tier 3

Requires inspire

Greater inspire

Passive

Gain advantage on the check for inspire to succeed, however if inspire is used on the very next turn have no advantage.

Unfathomable Aura

Bonus action

Move like the main character, when activated with a bonus action, roll 1d4 when attacked, if it's a 4 dodge the damage completely.

Usable half of charisma mod times per long rest

For each additional charge you expend in a fight lower the number required by 1, so use 2 charges to dodge on a 3 or 4, and 3 charges to dodge on 2,3 or 4.

Requires berate

Emphasis

Passive

Lower a random stat of the enemies by your cha mod and gain they're points to that stat for 3 turns.

Only gives from the highest stated enemy that's effected but all effected enemies lose the same amount of stat from the same category.

Gain the option to switch your attack stat on a weapon to the one that was taken for the duration

Punkrock

Passive

Berate effects people in a 25ft cone shape in front of you and can hit any number of enemies.

If berate is used on a single enemy, also deal 1d8+cha mod damage to them.

Tier 4

Requires punkrock and unfathomable aura

The silverhand

Passive

After hitting an enemy with berate and managing to defeat them, gain one charge to unfathomable aura. Gaining the charge counts as a use of this ability.

Managing to defeat an effected enemy with a guitar grants 2 charges

Usable cha mod times per long rest.

You may also use one use of this ability to gain advantage on a charisma check or save

Fixer tree

Tier 1

Deceivers

Gain proficiency in intimidation and deception

You can gain advantage when rolling these checks for cha mod times per long rest

Tier 2

Broker

Passive

Gain larger amounts of street cred, people are more likely to share information with you and give you jobs without a fixer.

Gain increased job chance, cuts of jobs and advantage on cha roll while attempting to close deals.

Connections

Main action

Make a cal to some friends in high places, roll a d20, depending on how high the roll is, the greater the called in ally is.

The ally will show up on the next turn with an action and will stay until the end of the fight or other circumstances.

You can direct this ally to do things for you with a bonus actions, otherwise they'll act on their own.

Usable once per long rest

Tier 3

Requires connections

Big fish

Passive

Gain one reroll on your connections roll.

Jumpstart

Bonus action

By placing both hands on an enemy initiate a shock onto their system, it deals 2d6 + cha mod damage and deals lightning damage.

When used outside of combat on enemies without countermeasures, they have to roll a con save to not be knocked out by the shock.

They wake back up upon taking damage or after enough time

Usable half of cha mod times per long rest

Requires broker

Charismatic

Passive

When you fail a charisma check, you can reroll it up to one time per usage.

Usable half of cha mod times per long rest

All knowing

Passive

Gain access to the thermal eye implants at the ripper doc

While implanted gain +1ac and the benefits of the eyes.

Tier 4

Requires all knowing and big fish

The rouge

You can use your cyber optic and operating system abilities one additional time per long rest.

Additionally, you can implant two different cyber optics.

On the turn you activate one of these abilities, gain advantage on your next roll and +1 ac for the turn.

Joytoy tree

Tier 1

Lucky

On luck based rolls, such as gambling or stocks, add your charisma mod once per long rest, **must state use beforehand**

Tier 2

Doll

Install a doll chip, gain three extra slots to download fighting styles or feats into. However, your doll chip can be activated by others.

Sweet talker

Reaction

Talking to an enemy has a massive chance to distract them from their surroundings outside of combat.

Inside of combat: use a reaction to impose disadvantage on whatever reaction the enemy takes with a distraction.

Tier 3

Requires doll

Self block

Use your doll chip to automatically succeed a Wis, int or charisma save

Usable half of cha mod times per long rest.

Chip mastery

Gain extra health equal to your cha mod x 2 for each fighting style or feat you have implanted

Also gain one more fighting style slot

Requires sweet talker

Tier four

The gambler

When faced with a save you can automatically pass, when attacked automatically dodge or when faced with any check automatically succeed.

However whenever you use this skill it stores one use of bad luck that the dm can impose onto you at any time.
